

Mobile device management solution  
created by Apple experts

The Ultimate Solution for Mobile Device Management

# Make A Difference with our 20 years of experiences

Mobile devices have become essential tools for enterprises and education fields to streamline their operations and enhance work efficiency. Mobile Device Management (MDM) is a solution that allows organizations to remotely deploy, control, and manage their fleet of mobile devices efficiently.

MDM helps organizations to save time and resources that would otherwise be spent managing devices manually, enabling organizations to focus on their core business activities without worrying about device management and security.

## Trusted Partner for Apple Business in Korea: Beyondtech since 2000

Established in January 2000, Beyondtech, Inc. is a leading IT company dedicated to delivering top-notch software development, localizations, sales, and technical support services to Korean customers. We are one of Apple's longest-standing partners in Korea.

With 20 years of experience in developing Apple platforms, Beyondtech has released MeerkatMDM, an MDM solution that perfectly fits to your diverse work environment and requirements.

It's time to enhance your work productivity and efficiency with MeerkatMDM.

MeerkatMDM is designed to meet the diverse work environment and requirements of organizations of all sizes.

# Flexible Deployment Options with MeerkatMDM

4. Non-removable user management profile

## Highly scalable

Our integration with Apple Business Manager revolutionizes device acquisition, configuration, and user deployment. By entrusting your devices to the MeerkatMDM solution, your mobile device management team no longer needs to handle the tasks of receiving, unboxing, installing apps, configuring, repacking, and delivering devices to users.

Additionally, our expert engineers are always available to provide fast support, ensuring that you can start using MeerkatMDM in no time.

Integrating MeerkatMDM with Apple Business Manager allows organizations to manage pre-registered mobile devices as Supervised mode devices, which can be remotely controlled for enhanced productivity. The managed mobile devices provide several benefits that can significantly improve work efficiency.

Join us at Beyondtech and let us help you manage your smart mobile devices with the most efficient MDM solutions available on the market.
